Software Developer

As an experienced leader and project lead I have always had the drive to tinker. With 20 years of Naval Service I am a Veteran who has a passion to solve the complex and interesting problems. I write code with a sense of visual design expertise. I am a Software Developer proficient in creating web applications and capable of working in a dynamic environment. As a seasoned communicator I possess the skills for both a technical and business audience. I am a team player who is known for tackling difficult obstacles such API integration, learning new libraries, and languages as demanded by the fast paced environment. At the end of the day life is more than code. I LIVE IT! The past 10 years I have competed and volunteered as leadership in bringing the Men's Roller Derby Association to fruition.
