Projects

Movie Finder application for finding top ten current movies. A team project displaying use of an API with a dynamic front end web design.

Dog Meet Dog Web project with a dating app feel for dog owners. Project displays creative front end design and Google API integration.

Software Developer

As an experienced leader and project lead I have always had the drive to tinker to solve the complex and interesting problems. I write code with a sense of visual design expertise. I am a valued communicator with the skills for both the technical and business professionals. Known as a team player for tackling difficult obstacles, and a constant learner as demanded by the fast paced environment.

Experience

www.leadjammerskates.com
Founder, eCommerce Roller Sports Store
Mar 2008 – Nov 2015
Development and design of the production eCommerce website using the Volusion CMS. With the creative access to the front end design, I spent 7 years creating a successful business and website that attracted repeat customers for several years. Volusion offered customer relationship management where I was able to build strong relationships with customers for several years. *HTML, CSS, PHP, CRM*

www.mensrollerderbyassociation.com
Board of Directors, Public Relations and Secretary
Dec 2010 – Mar 2013
Development and design of the production website used from May 2011 to December 2016. With expertise in front end design as Public Relations Director I was able to put in production a visually appealing project that was used for several years. As Directors we went on to develop and bring to fruition an all volunteer organization to support gender equality and diversity in the community of roller derby. *HTML, CSS, jQuery*

United States Navy
Senior Leadership/Management
Jun 1991 – Jul 2011
A leader who lead by example, provided guidance with instruction in dynamic projects and programs in both normal and expeditionary environments. A successful manager and leader who navigated well in large scale collaborative projects from ship's overhauls to detainee operations.
